

Score-ratio NN vs LASSO/Ridge ... direction recovery (setting 4, 20 iters)

Dashed line = oracle/truth. $H_YA = H_Y - H_X$ isolates alpha direction.

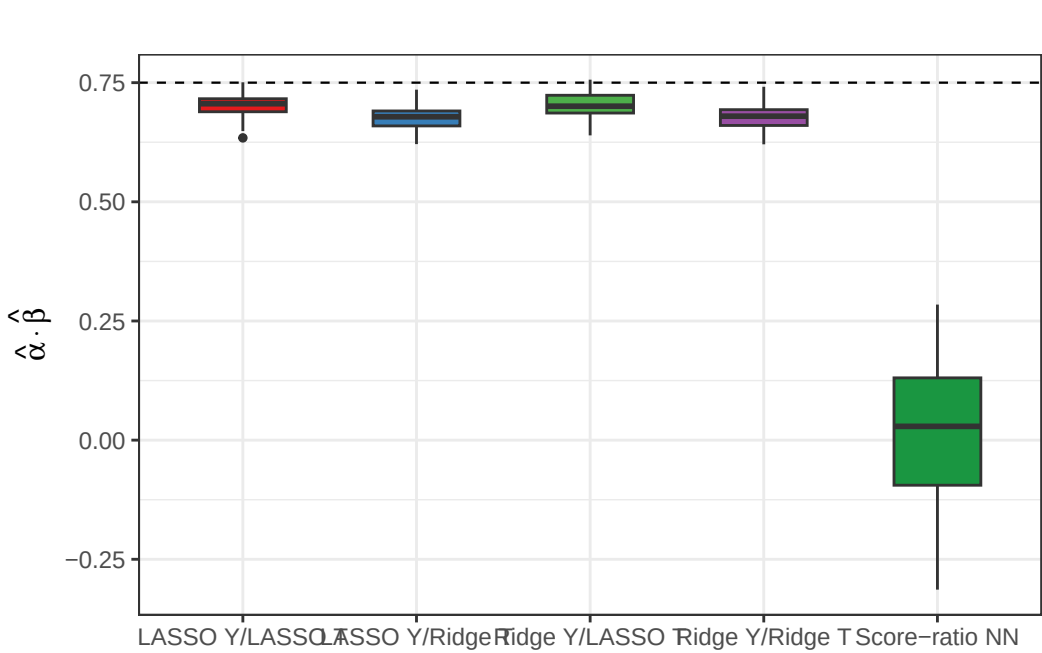

alpha recovery (outcome direction)

beta recovery (propensity direction)

Estimated $\hat{\alpha} \cdot \hat{\beta}$ (truth = 0.75)

Score-ratio NN: eigenvalue spectrum (rank-1 signal)
